PERMATEEK®
THE ULTIMATE SYNTHETIC DECKING

Better By Design

PERMATEEK®

THE ULTIMATE SYNTHETIC DECKING

PERMATEEK® marine decking can be fitted to almost any surface including GRP, Wood and Steel.

PERMATEEK® is an environmentally friendly composite decking system that offers the qualities and good looks of Teak but without the hassle. It has a roughened surface that looks like natural grain highly resistant to sun, rain and sea water with non-slip qualities when wet. It is flexible so can be shaped or contoured to any area and also offers sound insulating benefits.

Your deck will be designed and handmade with the same design and attention to detail as a real teak deck, and fitted by our professionally trained craftsmen who will provide a meticulous hand finishing with impressive detailing around deck fittings and curves making your **PERMATEEK®** deck visually indiscernible from a real teak deck.

There are so many advantages of fitting **PERMATEEK®** decking to your boat that you will wonder why you never did it before!

Seamlessly transform your deck space

LONGEVITY - Built from planks of UV stabilised PVC.

LOW MAINTENANCE - No regular wood sanding and oiling required, simply brush with soapy water.

LIMITED DOWN TIME - One day to pattern, and one day to fit! All other work is conducted in our workshops.

PRICE - Favourable pricing compared to real teak decking.

QUALITY CRAFTSMANSHIP - High quality fabrication process of thermal welding to form deck panels. We do not glue planks together.

SYNTHETIC DECKING AND HEAT - For those who are concerned about synthetic decks and how hot they get in direct sunlight. The truth is all synthetic decks just like real teak will get hot. **PERMATEEK®** in its original form has always been among the cooler choices on offer and the lighter the deck colour you choose the cooler it will be. That said, if it is a cool deck that you require then you just can't beat white fibreglass. If however like thousands of others you desire the good looks of a teak deck with all the benefits of a synthetic alternative then **PERMATEEK®** is an obvious choice.

PERMATEEK®

THE ULTIMATE SYNTHETIC DECKING

PERMATEEK®

THE ULTIMATE SYNTHETIC DECKING

MULTI-COLOUR RANGE

Multi-colour is a new addition to the **PERMATEEK®** range. Each plank is slightly different in colour to the adjacent plank giving an even more natural teak effect deck. Multi-colour is available in Dark, Light and Weathered versions.

PERMATEEK® LIGHT

For those where weight is an issue we offer **PERMATEEK® LIGHT**, it is lighter, cooler and uses a proven formula.

Lighter: Over 30% lighter than our standard range.

Cooler: Cools quicker than the standard range.

Proven: Same proven formula for over 12 years.

WHAT MAKES PERMATEEK® DIFFERENT?

- Embossed backing for exceptional adhesion
- Caulking line runs through the plank top to bottom
- 100% virgin PVC
- Same proven formula
- Wood grain texture and effect - looks like real teak
- Great non slip qualities
